

## Week 14 Coding Assignment by Dylan Decker

Follow the instructions for making a video submission for this coding assignment. Your video should, at a minimum, do the following:

Show that you can add a pet store to the data tables by sending an HTTP POST request to the running application.

Show that you can modify an existing pet store by sending an HTTP PUT request to the running application.

Demonstrate that an incorrect pet store ID supplied to a modify operation results in a 404 (Not Found) status.
